

FULL ARCH CLUB®

MASTERCOURSE

FULL ARCH IMMEDIATE LOADING

WARNING:

This is not your typical implant course. Actually, this is not even an implant course.

This the ultimate experience that will teach you how to solve virtually 100% of your full arch cases in one day, with immediate loading.

You will learn how to do it with no bone substitutes, no membranes, no digital guides, no special equipment and no complicated theoretical concepts that only a few ultra-gifted doctors are able to replicate.

Are you ready?

Morning

General principles and technical aspects of Full Arch Immediate Loading surgery

- Literature, biomechanics, common features, myths and facts
- Diagnosis, exams, patient preparation and case preparation

Surgery features

- Anatomy, incisions and flaps
- Bone reduction, implant placement and abutments
